Senior Full Stack Engineer and Tech Lead with 5+ years in system design, scalable cloud products, and production AI (LLM agents, MCP servers).

EDUCATION

Universidad Iberoamericana (UNIBE)
Computational Technologies Engineering, focused on Software Engineering, Distributed Systems, Databases, and Computer Networks.

Instituto Tecnológico de las Américas (ITLA)
Associate Degree in Software Development, focused on Full Stack Development, Mobile Applications, and Software Architecture.

EXPERIENCE

VB Solutions, *Senior Software Engineer & Tech Lead* Jan 2025 – Present

- Tech Lead of a team of 4 engineers (reviews, mentoring, planning): 20% faster delivery, 15-25% fewer production bugs.
- Built MCP servers used in production and a cross-module ERP AI agent that infers user intent, calls tools (read-only database access plus scoped write functions), and logs its mistakes to improve.
- Shipped AI-powered workflows that cut manual task time by 30% across business departments.
- Delivered 50+ client ERP (Odoo) implementations plus full stack and automation solutions, improving efficiency by up to 40%.
- Build APIs and integrations (payments, Playwright scraping, Socket.IO) shipped via GitHub Actions CI/CD, Jest and Playwright tests.
- Ground production AI features with RAG over pgvector embeddings, LLM evaluation checks, and OpenTelemetry/Sentry tracing.
- Designed and built the official site vbsolutions.info and led its SEO, ranking it among the top search results for its key terms.
- Built event-driven pipelines on AWS (Lambda, SQS, S3) with CloudWatch, plus reporting on PostgreSQL and Power BI.

Lifter, *Senior Software Engineer* Jun 2023 – Jan 2025

- Built an AI invoice processing system that extracts purchase data from images and matches products, journal entries, and accounting records, cutting invoice registration time by over 80%.
- Delivered 10+ web solutions for financial clients using React, Next.js, Node.js, and Odoo, aligned with business requirements.
- Led the architecture of web applications, APIs, integrations, and internal tools, reducing manual processes by 25%.
- Designed and implemented electronic invoicing integrations with DGII using C# and .NET, automating fiscal compliance.
- Unified enterprise systems and client applications on AWS (ECS, RDS, S3), lowering operational costs by 15%.

International Pack & Paper, *Full Stack Developer* Feb 2023 – Jun 2023

- Enhanced e-commerce platforms using React, improving user experience, accessibility, and customer engagement.
- Developed custom invoicing solutions that streamlined financial workflows and improved document accuracy.

Nelmix Solutions, *Full Stack Developer* Sept 2022 – Feb 2023

- Migrated and enhanced 8+ Odoo modules using Python and JavaScript, improving maintainability and delivery efficiency.
- Integrated third-party APIs to extend platform capabilities and support client-specific business requirements.

Freelance Full Stack Developer Jan 2021 – Aug 2022

- Developed custom Odoo modules for Atlantic Shutters to optimize sales, purchasing and inventory workflows.
- Built and delivered web applications for small business clients (React, Node.js), from requirements to deployment.

PROJECTS

Viollet | *viollet.app*

- Finance app that turns bank emails into a categorized ledger, with a chat assistant to query and edit it. 10,000+ transactions processed.
  Techs: *Next.js, TypeScript, Vercel AI SDK, Gemini (Vertex AI), Turso, Gmail API + Google Pub/Sub*

SargoTech | *sargotech.com*

- Early warning platform rating Dominican beaches on a traffic-light map and forecasting sargassum. CTO and lead dev, 4 cofounders.
  Techs: *React, MapLibre GL, Node.js + Express, Python, NOAA GOES/ERDDAP satellite data*

Tracky | *tracky.fit*

- Minimalist fitness tracker: log meals and workouts in one sentence, with goals and progress charts. 100+ active users.
  Techs: *Next.js, TypeScript, Vercel AI SDK (Gemini), Zod, Drizzle, Neon Postgres, Clerk, R2, Vitest, GitHub Actions*

Chatify | *chatify.fraineralex.dev*

- Real-time chat for text, media and files, on a self-configured cloud server with automated deploys and signed media delivery.
  Techs: *React, Node.js, Socket.IO, Turso, AWS (EC2, S3, CloudFront), Caddy, PM2, GitHub Actions*

SKILLS

Languages: TypeScript, JavaScript, Python, C#, SQL
Frontend: React, Next.js, React Native, Vue.js, Tailwind
Backend: Node.js, Express, NestJS, FastAPI, .NET, Odoo, Socket.IO, WebSockets, BullMQ
AI: LLM agents, RAG, embeddings, pgvector, LLM evaluation, fine tuning, LangGraph, OpenAI Agents SDK, Vercel AI SDK, MCP
Testing & DevOps: Jest, Playwright (tests and scraping), GitHub Actions CI/CD, Terraform (IaC), OpenTelemetry, Sentry, Scrum
Cloud & Databases: AWS (Lambda, S3, RDS, ECS, EC2, SQS, CloudFront, DynamoDB, CloudWatch, Bedrock, SageMaker), Azure (Functions, App Service, Azure SQL), Cloudflare, Docker, Kubernetes, Terraform, PostgreSQL, SQL Server, Redis, MongoDB
Spoken Languages: Spanish (Native), English (C1)
