

Frainer Encarnación

Senior Full Stack Engineer with **5+ years** of experience designing, building, and delivering scalable software solutions, cloud infrastructure, and business automation systems across the full software lifecycle.

Relevant Experience

Senior Software Engineer • **VB Solutions** Jan 2025 — Present

- Delivered full stack software, and automation solutions across multiple industries, improving operational efficiency by up to **40%**.
- Build and integrate applications, APIs, payment gateways, and third-party services to improve business processes and reduce manual work.
- Deliver AI-powered solutions that reduced manual task time by **30%** across business departments.
- Design and maintain cloud infrastructure, reporting solutions, and data platforms using AWS, PostgreSQL, and **Power BI**.
- Led code reviews, mentored developers, and supported delivery of software projects, improving team delivery speed by **20%** and reducing production bugs by **15–25%**.

Senior Software Engineer • **Lifter** Jun 2023 — May 2026

- Delivered **10+ scalable web solutions** using React, Next.js, Node.js, and Odoo, aligning technical implementations with business requirements.
- Led the architecture and development of web applications, APIs, integrations, and internal tools, improving operational efficiency and reducing manual processes by **25%**.
- Designed and implemented electronic invoicing integrations with **DGII** using C# and .NET, automating fiscal document workflows and compliance processes.
- Integrated enterprise systems and client applications into unified platforms, reducing operational costs by **15%** and improving overall system performance.

Full Stack Developer • **International Pack & Paper** Feb — Jun 2023

- Enhanced **e-commerce platforms** using React, improving user experience, accessibility, and customer engagement.
- Developed custom invoicing solutions that streamlined financial workflows and improved document accuracy.
- Built and maintained full-stack applications using React, Node.js, and Python, improving system performance and reliability.

Full Stack Developer • **Nelmix Solutions** Sept 2022 — Feb 2023

- Migrated and enhanced **8+ Odoo modules** using Python and JavaScript, improving maintainability and delivery efficiency.
- Integrated third-party APIs to extend platform capabilities and support client-specific business requirements.
- Introduced code review and **Agile practices** that improved team collaboration and accelerated project delivery.

Education

Universidad Iberoamericana (UNIBE)

B.S. in Computational Technologies Engineering

Instituto Tecnológico de las Américas (ITLA)

Associate Degree in Software Development

Skills

Languages

TypeScript, JavaScript, Python, C#, SQL.

Frontend

React, Next.js, React Native, HTML, CSS, Tailwind.

Backend

Node.js, Express, ASP.NET, Odoo.

Cloud, Infrastructure & Databases

AWS, Cloudflare, Docker, Kubernetes, Terraform, PostgreSQL, SQL Server, MongoDB, Redis.

Selected Projects

Viollet | violet.app

An AI-powered personal finance platform that automatically tracks and categorizes expenses from bank transaction emails.

Techs: TypeScript, Next.js, SQLite, Clerk, AI SDK, Gmail API, Google Pub/Sub, Webhooks

Tracky | tracky.fit

A smart, robust and minimalist fitness tracking web app with AI-powered features to quickly log meals and exercises, currently serving **100+ active users**.

Techs: TypeScript, Next.js, Drizzle, Postgres, Clerk, Framer Motion, Tailwind, OpenAI API, R2

Chatify | chatify.fraineralex.dev

Realtime chat app with robust support for text messages, emojis, stickers, GIFs, media, files, and more, allowing users to easily interact.

Techs: TypeScript, React, Auth0, Node.js, Turso, Zustand, AWS (EC2, S3, CloudFront)
